Ellipso®

- Available in your choice of black or translucent
- Snap fit lids remain securely closed even when stacked
- Clear tops help servers quickly identify cup contents
- Made from strong, crack resistant material

Branding Capability

In-Mold Labeling

- This process uses a label that is actually molded into, and becomes part of, the container - your label never peels off
- Cutting-edge technology creates breathtakingly, realistic imagery
- Photographic images "pop off" the container and colors are true and vivid

Available Products

- 12, 16 and 32 ounce square containers
- 48 ounce round containers
- 32 ounce rectangular containers
- Custom sizes are available

Features

Outstanding realistic photo and 3D images with up to 10 color graphics

Minimum 4 point type print capability on labels

Label-less decorating

Durable label

Reusable container

In-house graphic design team

Benefits

True-to-life images

Print legal and nutritional information without detracting from your message

Label becomes part of the container for a more upscale and unique brand image

Scratch resistant, food and dishwasher safe for a long, reusable life

Consumers will appreciate the ability to use the container for many purposes

Label designed to your specifications

Dry-Offset Printing

- Leading edge, machine-applied process
- Effective method for high speed, large volume container printing of multi-colored line copy, halftones and full process color art
- Advanced graphic technologies and equipment deliver superb results
- A wide range of color options, container sizes and features
- The latest "quick to market" electronic technology brings products from concept to finished product faster
